Education

University of Western Ontario, London, ON, Canada

Graduated: June 2026

Bachelor of Science - Honours Specialization in Computer Science

Work Experience

Automation Developer Intern

May 2025 – Aug 2025

General Dynamics Land Systems, London, ON

- Identified workflow bottlenecks and designed Python scripts that eliminated repetitive manual tasks in Supply Chain Management.
- Designed and implemented a normalized SQL schema to consolidate inconsistent Excel spreadsheets.
- Automated part identification, report generation, and email communications, reducing manual tasks by 5-10 minutes per item and significantly optimizing project timelines.

Software Developer Intern

May 2024 – Dec 2024

Goodself, Toronto, ON (Remote)

- Implemented event tracking using TypeScript across 13 key pages of a React web app enabling more precise user analysis.
- Managed Mixpanel and Firebase analytics to identify areas needing improvement, boosting user retention on the specified pages.
- Conducted end-to-end and UAT testing across development, staging, and production environments reducing production environment bugs.

Software Engineer Intern

Jan 2024 – Apr 2024

FimiMall, Milton, ON (Remote)

- Optimized search data using MongoDB, Studio 3T, and Elasticsearch, running Docker to access containerized database services locally, reducing response times and improving data retrieval reliability.
- Integrated search phrase and search term queries within the Java Spring Boot backend to enhance product ranking, leading to an increase in relevant search results.
- Used Postman to test REST API endpoints and validate HTTP requests, improving integration reliability.

UX/ UI Design Intern

June 2022 – Sept 2022

Simulence, Toronto, ON (Remote)

- Conducted surveys and live interviews with 8 senior game developers, identifying pain points that led to 3 process improvements in the game development cycle.
- Designed the main website's user interface using Figma, resulting in an intuitive and visually appealing experience for users.

Projects

Personal Portfolio (<https://cr1py.github.io/>)

Technology used: TypeScript, HTML, CSS, React.js, Vite, Node.js

- Built a personal website using React and Vite, with UI components made in TypeScript with CSS/HTML styling.
- Used Git for version control, and GitHub pages to deploy the website.

Western University Course Auto Grader (Group Capstone Project)

Technology used: Python, KDL (Kernel Document Language), Pydantic, Docker, Jinja, HTML, CSS, pytest, Gradescope API, Git

- Designed a modular Python auto grader system with a custom KDL based configuration file.
- Built isolated code execution with resource limits and a Pydantic validated data pipeline between sandbox and host process.
- Rendered reports with expected vs. actual output comparisons and exception handling using Jinja and HTML/CSS

Skills

- **Languages:** Python, Java, JavaScript, TypeScript, C, SQL
- **Frameworks & Libraries:** React, React Native, Node.js, Express.js, HTML, CSS, JSON
- **Databases:** MySQL, MongoDB, Firebase
- **Development Tools:** Docker, GitHub, Git, Jira, Confluence, Google Colab, Studio 3T, Postman
