

Christine Bautista

604-970-8617 | Vancouver BC, Canada (open to Toronto ON relocation)

c.bautista2503@gmail.com | www.linkedin.com/in/cbautista25 | github.com/Cr1py | cr1py.github.io

Education

University of Western Ontario
Bachelor of Science - Computer Science

Graduated: June 2026
London, ON

Experience

Automation Developer Intern

May 2025 – Aug 2025

General Dynamics Land Systems

London, ON

- Built Python automations to automate part identification, report generation, and email communications reducing manual workload by 10 hours per week.
- Designed and implemented a SQL schema to consolidate inconsistent Excel spreadsheets, improving data accuracy and accessibility.

Software Developer Intern

May 2024 – Dec 2024

Goodself

Toronto, ON (Remote)

- Implemented data analytics and event tracking with TypeScript across 13 web pages to analyze user behavior.
- Built reusable React components with TypeScript, HTML, and CSS, improving design consistency.
- Managed Mixpanel and Firebase analytics to identify user experience problems, increasing user retention.
- Conducted unit, end-to-end and UAT testing across development, staging, and production environments reducing production level bugs.

Software Engineer Intern

Jan 2024 – Apr 2024

FimiMall

Milton, ON (Remote)

- Used Postman to test REST API endpoints and validate HTTP requests, improving integration reliability.
- Optimized search data using MongoDB, Studio 3T, and Elasticsearch, and used Docker for local containerized database services, reducing response times and improving data retrieval.
- Integrated search phrase and search term queries within the Java Spring Boot backend, leading to an increase in relevant search results.

UX/ UI Design Intern

Jun 2022 – Sep 2022

Simulence

Toronto, ON (Remote)

- Designed the main website's user interface using Figma to create a better accessible and intuitive experience for users.
- Conducted surveys and live interviews with 8 senior game developers, identifying pain points that led to 3 process improvements in the game development cycle.

Projects

Western University Assignment Autograder

Sep 2025 – Apr 2026

Technology used: Python, KDL (Kernel Document Language), HTML, CSS, Docker, Jinja, pytest, Pydantic, Git

- Worked alongside supervising professor and a group of 3 to develop a modular Python autograder for their first-year computer science course.
- Designed a KDL-based configuration system supporting reusable test cases and multiple assignment formats.
- Implemented sandboxed code execution with resource limits and Pydantic validation.
- Rendered reports with expected vs. actual output comparisons and exception handling using Jinja and HTML/CSS

Skills

- Languages:** Python, Java, JavaScript, TypeScript, SQL, HTML, CSS
- Frameworks & Libraries:** React, React Native, Vite, Node.js, Spring Boot
- Cloud & DevOps:** Firebase, Docker, GitHub Actions, CI/CD
- Databases:** MongoDB, MySQL, SQLite
- Tools & Technologies:** GitHub, Studio 3T, Postman, REST APIs
